

GALLON MEASUREMENT CONVERSION ACTIVITY

Materials:

1 blank sheet of white paper per student

7-8 different colored pens, crayon, markers or pencils per student

Procedure:

1. Read these instructions one at a time to the students, allowing them to follow along. Create the same drawing on the white board with as many different colors as available as the students create theirs.

Color 1- draw a thick border around the page

Color 2- divide the box into 4. You now have 4 quadrants.

Color 3- divide one of those quadrants in 2.

Color 4- divide one of those boxes (color 3) in 2. Divide two quadrants in 4. You should still have one blank quadrant.

Color 5- Pick one square in quadrant 4 and divide into 8.

Color 6- Pick one square in quadrant 4 and divide into 16.

Color 7- Pick one square in quadrant 4 and divide into 48. Leave one quadrant blank

2. Go back and label the boxes

- 1 gallon
- 4 quarts
- 2 pints
- 2 cups
- 4 cups
- 8 ounces
- 16 tablespoons
- 48 teaspoons

3. Students may use this as a cheat sheet on their conversion quizzes.
